MADE IN THE UNITED STATES OF AMERICA

CONTENTS OF VOLUME 6

Number 1, March 1976

Foreword

A. L. Washburn. Periglacial Indicators of Permafrost 1

Robert F. Black. Periglacial Features Indicative of Permafrost: Ice and Soil Wedges 3

Richard P. Goldthwait. Frost Sorted Patterned Ground: A Review 27

Ronald C. Flemal. Pingos and Pingo Scars: Their Characteristics, Distribution, and Utility in Reconstructing Former Permafrost Environments 37

James B. Benedict. Frost Creep and Gelifluction Features: A Review 55

Sidney E. White. Rock Glaciers and Block Fields, Review and New Data 77

Richard D. Reger and Troy L. Péwé. Cryoplanation Terraces: Indicators of a Permafrost Environment 99

Letters to the Editor

Austin Post. The Tilted Forest: Glaciological–Geologic Implications of Vegetated Neoglacial Ice at Lituya Bay, Alaska 111

W. C. Mahaney. Symposium on Quaternary Stratigraphy, York University, Toronto, Canada, May 23–25, 1975 119

Book Reviews 123

Number 2, June 1976

J. H. Mercer. Glacial History of Southernmost South America 125

J. T. Andrews and M. A. W. Mahaffy. Growth Rate of the Laurentide Ice Sheet and Sea Level Lowering (with Emphasis on the 115,000 BP Sea Level Low) 167

John England. Late Quaternary Glaciation of the Eastern Queen Elizabeth Islands, N. W. T., Canada: Alternative Models 185

Johannes Weertman. Sliding–No Sliding Zone Effect and Age Determination of Ice Cores 203

K. W. G. Valentine and J. B. Dalrymple. Quaternary Buried Paleosols: A Critical Review 209

Philip V. Wells. Macrofossil Analysis of Wood Rat (*Neotoma*) Middens as a Key to the Quaternary Vegetational History of Arid America 223

Hilary H. Birks, M. C. Whiteside, Donna M. Stark, and R. C. Bright. Recent Paleolimnology of Three Lakes in Northwestern Minnesota 249

Calvin J. Heusser. Palynology and Depositional Environment of the Río Ignao Nonglacial Deposit, Province of Valdivia, Chile 273

Robert C. Thunell. Calcium Carbonate Dissolution History in Late Quaternary Deep-Sea Sediments, Western Gulf of Mexico 281

Liselotte Diester-Haass. Late Quaternary Climatic Variations in Northwest Africa Deduced from East Atlantic Sediment Cores 299

Letters to the Editor
William L. Donn. Comment on "Ice Ages and the Thermal Equilibrium of the Earth, II," by D. P. Adam 315
David P. Adam. Reply to Comments by William L. Donn 317

Book Reviews 319

Announcement 324

Number 3, September 1976

R. G. Johnson and B. T. McClure. A Model for Northern Hemisphere Continental Ice Sheet Variation 325

Waltraud A. R. Brinkmann. Surface Temperature Trend for the Northern Hemisphere–Updated 355

J. M. Bowler, G. S. Hope, J. N. Jennings, G. Singh, and D. Walker. Late Quaternary Climates of Australia and New Guinea 359

Richard Foster Flint. Development of Quaternary Stratigraphy in Northeastern United States and Adjacent Canada 395

Edward B. Evenson, William R. Farrand, Donald F. Eschman, David M. Mickelson, and Louis J. Maher. Greatlakean Substage: A Replacement for Valderan Substage in the Lake Michigan Basin 411

Fekri A. Hassan. Heavy Minerals and the Evolution of the Modern Nile 425

Charles E. Stearns. Estimates of the Position of Sea Level between 140,000 and 75,000 Years Ago 445

Letters to the Editor
J. G. Lockwood. The Energy Requirement of a Growing Ice-Sheet: Comment on "Ice Ages and the Thermal Equilibrium of the Earth, II" by David P. Adam 451
David P. Adam. Reply to Comments by J. G. Lockwood 452

Book Reviews 455

Number 4, December 1976

A. L. Washburn. Editorial Comment 469

John E. Kutzbach. The Nature of Climate and Climatic Variations 471

J. Murray Mitchell, Jr. An Overview of Climatic Variability and Its Causal Mechanisms 481

Edward N. Lorenz. Nondeterministic Theories of Climatic Change 495

F. Kenneth Hare. Late Pleistocene and Holocene Climates: Some Persistent Problems 507

Richard Foster Flint. Physical Evidence of Quaternary Climatic Change 519

Rhodes W. Fairbridge. Effects of Holocene Climatic Change on Some Tropical Geomorphic Processes 529

Luna B. Leopold. Reversal of Erosion Cycle and Climatic Change 557

T. J. Blasing and H. C. Fritts. Reconstructing Past Climatic Anomalies in the North Pacific and Western North America from Tree-Ring Data 563

H. E. Wright, Jr. The Dynamic Nature of Holocene Vegetation. A Problem in Paleoclimatology, Biogeography, and Stratigraphic Nomenclature 581

Irving Rouse. Peopling of the Americas 597

Book Reviews 613

Author Index for Volume 6 619

Cumulative Subject Index for Volume 6 621

QUATERNARY RESEARCH

An Interdisciplinary Journal

EDITORIAL POLICY

Quaternary Research is devoted to *interdisciplinary* articles dealing with the Quaternary Period. Editorial policy requires that articles must be of broad interest, of basic significance to more than one discipline, and of high merit. Previously unpublished research results, comprehensive reviews of a field of knowledge, and occasional English translations of outstanding articles in other languages will all be considered. Generally, articles should be in English, but a small proportion of articles in French, German, or Russian will be accepted. Articles should not exceed 5000 words, but exceptions can be made for especially significant contributions. All articles will be reviewed by at least two referees.

Manuscripts and figures should be submitted at least in duplicate (a third copy could speed processing) to:

Quaternary Research
Editorial Office
University of Washington
Seattle, Washington 98195

INSTRUCTIONS TO AUTHORS

General Instructions

Manuscripts should be written in clear and concise English and should conform to the general style of the journal and the specific instructions listed below. Manuscripts that are not adequately prepared will be returned to the authors, since it is not feasible for the Editors to revise or rewrite manuscripts. Contributors, particularly those unfamiliar with English usage, are encouraged to seek the help of colleagues in the preparation and review of manuscripts prior to submission. This practice reduces the time required for review and avoids delays in publication.

Form and Style. Manuscripts should be concise but detailed enough to permit critical appraisal. They should be typewritten and double-spaced throughout (including tables, legends, and footnotes) on one side of approximately 22- × 28-cm (8.5- × 11-in.) paper with 2.5-cm (1-in.) margins. Tables and figure legends should be typed separately and placed at the end of the manuscript. All pages, beginning with the title page and including tables and figure legends, should be numbered consecutively and fastened securely. The title page should include the article title, author(s), affiliation(s) and address(es), and suggestions for index entries. Addresses should include zip codes or postal districts when applicable. All correspondence regarding the manuscript will be made with the person submitting the manuscript.

Authors are requested to include an Abstract (50-200 words, typed on a separate page following the title page). The Abstract should be a concise and informative summary that can be copied verbatim by bibliographers. The title must be suitable for indexing.

Units. Metric units should be used throughout, with English equivalents in parentheses if originally given in English units. When used in conjunction with numerals, units should be abbreviated and unpunctuated (e.g., cm, g, %). Use the American Chemical Society Handbook as a guide.

Footnotes. Footnotes in the *text* should be identified by superscripts consisting of Arabic numerals and should be typed on a separate sheet; footnotes in the *tables* should be identified by superscripts consisting of the lower-case letters a, b, c, etc., and placed at the bottom of the table.

Tables. Tables should be denoted by Arabic numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. *Units must be clearly indicated for each of the column entries in the table.*

Figures. All figures should be denoted by Arabic numerals and cited consecutively in the text, with figure legends typed on a separate sheet. Units should be clearly indicated in the figures themselves.

Please Note: All figures are to be submitted in such form as to permit photographic reproduction without retouching or redrawing, including the lettering. Lettering is reproduced as part of the photoengraving and is not set in type. Line drawings should be carefully drafted with black India ink on white drawing paper or blue drafting cloth, if possible no larger than 22- × 28-cm (8.5- × 11-in.) overall. The lettering should be large enough to allow a 50% reduction. High-quality glossy prints are acceptable for drawings and required for photographs. Color plates or fold-out illustrations cannot be accommodated unless financed by the author.

References. References should be cited in the text by author's surname and date such as "Doe (1970) reported that . . ." ". . . as previously reported (Doe *et al.*, 1970)." Suffixes (a, b, etc.) should be used to distinguish two or more works by the same author(s) in the same year; *e.g.*, Doe (1971a, 1971b). *Page numbers should be given whenever practicable.* A direct quotation should always be page referenced; a paraphrased statement should be page referenced if the article exceeds 10 pages. The reference section should be arranged alphabetically according to the author's surname. Order of items: author(s), date of publication, title of article, journal or book title (written out in full rather than abbreviated), volume number, inclusive pages, and (for books only) publisher and city, e.g.:

Zin, S. (1971a). The problem of Quaternary climatic changes. *Quaternary Research* 1, 1–10.

Falk, B., and Li M. (1972). "The Cause of Quaternary Climatic Changes." Vol. 1. Academic Press, New York.

Cohen, R. (1967). The equatorial ionosphere. *In* "Physics of Geomagnetic Phenomena." (S. Matsushita and W. H. Campbell, Eds.), Vol. 1, pp. 561–613. Academic Press, New York

Author's alterations in excess of 10% of the cost of composition will be charged to the author.

Reprints. 50 reprints of each article will be supplied free of charge. Additional reprints can be ordered on the form accompanying galley proof.
